TWO-DAY COURSE
6 - 7 NOVEMBER 2022

MORE & REGISTER
[ACRM.org/acbis](https://www.acrm.org/acbis)

The Brain Injury Association of America offers a national certification program through its Academy of Certified Brain Injury Specialists (ACBIS). This two-day training is the official course designed to

prepare participants to sit for the Certification Exam and join more than 7,000 Certified Brain Injury Specialists worldwide by applying for and passing a national examination. The course is also appropriate for paraprofessionals and professionals at all levels who simply want a strong foundation in the best practices in brain injury rehabilitation and/or CME/CEUs.

Learning Objectives:

- Define or describe topics including: diagnostic imaging; medical/physical/cognitive/neurobehavioral/psychosocial consequences; pediatrics/adolescents/aging/military populations; concussions/mTBI; disorders of consciousness; rehabilitation philosophy; outcome measurement; care management; family/cultural/gender/sexuality issues; neuropsychology; participation/return to work
- Prepare to successfully earn a national credential
